MEDIA RELEASE

Most tests ever conducted by the CCES in one year

(Ottawa, ON) The Canadian Centre for Ethics in Sport's (CCES) is pleased to report that 3,400 doping control tests were conducted in the year 2001. This number represents the highest number of tests conducted by the CCES in any given year. Of the total tests conducted by the CCES, 2,299 of these tests were conducted on Canadian athletes.

Rosemary Foerster, the CCES's Drug-free Sport Program Manager, noted that "our increased testing level in 2001, both of Canadian athletes and international athletes training and competing in Canada, sends a strong message to all athletes that they may be tested anytime, anywhere".

The CCES reports statistics in the following categories:

Domestic Program: A total of 1,931 tests were conducted as part of the domestic testing program. Of these tests, 1,920 were conducted on Canadian athletes with 1,288 (67%) on an unannounced basis and 632 (33%) on an announced basis. Thirteen infractions were recorded in ten different sports including Athletics, Biathlon, Bobsleigh, Canadian Interuniversity Sport (CIS) (Basketball, Field Hockey, Football & Ice Hockey), Junior Football, Taekwondo and Weightlifting.

Major/International Games: A total of 921 tests were conducted at international events held in Canada last year resulting in 150 Canadian athletes and 771 foreign athletes being tested. A total of 36 international events were held in Canada where doping controls were conducted by the CCES.

World Anti-Doping Agency (WADA) tests: A total of 430 tests were conducted at the request of the World Anti-Doping Agency. One hundred and fifty-six (156) tests were carried-out on Canadian athletes and 274 on foreign athletes. All of these tests were conducted on an unannounced basis.

International Federation (IF) tests: At the request of various International Federations, the CCES conducted 45 tests on foreign athletes last year. All of these tests were conducted on an unannounced basis.

Contract Service tests: As a result of requests received from sport organizations outside of the Canadian Policy on Doping in Sport, a total of 73 tests were conducted. One (1) infraction was recorded in the sport of Bodybuilding.

The CCES is responsible for all aspects of drug-free sport, including athlete testing. Recently certified under ISO 9002 for the management of its domestic doping control program, the CCES provides quarterly and annual reports of all doping control tests carried out in Canada.
