

## MEDIA RELEASE

### **Focus on Education, Outreach: Doping Control Statistics for 2006-2007**

(Ottawa, Ontario – May 16, 2007) – The Canadian Centre for Ethics in Sport (CCES) conducted 3,481 doping control tests over the fiscal year from April 1, 2006 to March 31, 2007, our highest ever annual total. The majority were carried out under the Canadian Anti-Doping Program (2,728 tests), which is funded by Sport Canada. See the attached table for a breakdown by sport on tests conducted on Canadian athletes.

Within the domestic program, 21 anti-doping rule violations were reported. Nine athletes in the sports of athletics, bobsleigh (2), CIS football and hockey, duathlon, junior football (2), and racquetball were given sanctions ranging from one year ineligibility to lifetime ineligibility for sport. The remaining 12 violations were for cannabis and resulted in a warning and reprimand with no period of ineligibility. A table summarizing the 21 violations is attached, along with the current anti-doping violations registry.

The CCES also carried out doping control on a fee-for-service basis for various national and international sport organizations. A total of 494 tests were conducted at 53 international events held in Canada; highlights included the first ever World Outgames held in Montreal in August, the World Lacrosse Championships, the Women's World Rugby Championships, and World Cups in luge, bobsleigh, speed skating, and paralympic cross-country. The CCES also did testing on behalf of the World Anti-Doping Agency (125 tests) and the Association of National Anti-Doping Organizations (23 tests). These tests were conducted on both Canadian and international athletes.

An additional 111 tests were provided for national organizations, including 68 tests under contract to the Quebec Major Junior Hockey League and Quebec Midget AAA Development Hockey League. The agreement with the Canadian Hockey League (CHL) announced in October focused on educating trainers and players during the 2006-2007 season. The CCES and the CHL will use the off-season as an opportunity to continue education and prepare all players and personnel for testing in the 2007-2008 season.

### Education and Outreach: using technology to connect

The CCES maintains that education is a critical part of a comprehensive anti-doping program. During the last quarter of the period, the CCES made great strides in the areas of education and athlete outreach. In March, the CCES' Online Education course was launched to the 800 athletes in our registered testing pool. "The e-learning effort is intended to provide all the information athletes need to make the right decisions," said CCES President and CEO Paul Melia, "in a dynamic online format that minimizes disruption to athletes' schedules and reduces the cost of providing education to a widely distributed audience."

In an effort to reach another key audience, Canada's up-and-coming development athletes, the CCES sent a mission to the Canada Games in Whitehorse in February to familiarize the 2,500 participants with the spirit of ethical sport and the rules of doping control. Over 125 athletes completed a new interactive doping quiz, and over 3,000 athletes and coaches went away with a lip balm stick that promotes the DID global (Drug Information Database) at didglobal.com.

The DID global is an online substance inquiry service provided by the CCES to help athletes determine if a certain medication is prohibited in sport. The DID was upgraded in December and gained a new partner in the Olympic Council of Asia. It continues to be a very popular service, as shown in the graph below.

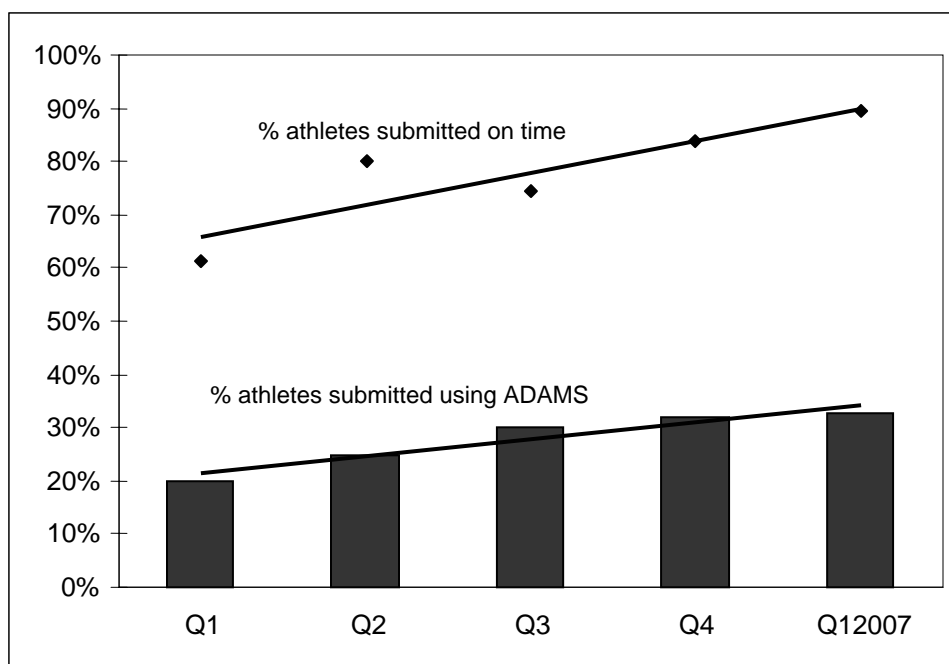

Figure 1: Substance Inquiries on Canadian products at didglobal.com

The CCES made other advances in educating athletes about the specifics of prohibited substances, with an eye to reducing the number of inadvertent positive tests. The NSF International Certified for Sport™ program was launched in July 2006, with the goal of providing supplement manufacturers with the means to test and certify their products to be free of prohibited substances. To date, 12 products have been certified under the program.

A second program, an online education and awareness campaign targeted at young athletes, vividly illustrates the various possible consequences of marijuana use. The multimedia website was funded by Health Canada and developed in partnership with Canadian Interuniversity Sport, Canadian Colleges Athletic Association, Football Canada, Canada Games, Canadian Association for Health, Physical Education, Recreation and Dance, and the RCMP, and will be launched in the early summer of 2007.

### **Anti-Doping Policy: reinforcement and renewal**

The Canadian Anti-Doping Program itself was strengthened this year by progress on blood testing and athlete whereabouts. CCES continued to prepare for a full-scale blood testing program by sharing best practices with other anti-doping organizations and certifying our Doping Control Officers for blood collection. Compliance continues to improve in whereabouts reporting after the CCES started to follow up on missing or incomplete whereabouts submissions in November. Athletes are increasingly using ADAMS, a convenient online tool provided by WADA, to submit and update their whereabouts.

*Figure 2: Athlete Whereabouts Program Trends*

The World Anti-Doping Code, the foundation of the Canadian Anti-Doping Program, entered a renewal phase in January when a proposed draft was issued by the World Anti-Doping Agency. The CCES held major consultations with stakeholders in the Canadian sport community: an interpretation was distributed, followed by a public forum at the Ottawa Congress Centre that was broadcast live over the internet for national participation. Joseph de Pencier, Director of Ethics and Anti-Doping Services, noted, “The feedback we received showed strong support for the mandatory education component proposed in the draft Code, and we are counting on the sport community to demonstrate their commitment to education by promoting our new CCES Online Education program.” The submission to WADA on March 30 was a comprehensive critique that will inform the next draft this June.

Lastly, the CCES moved offices at the very end of the fiscal year. Our new address is 350-955 Green Valley Crescent, Ottawa ON K2C 3V4, and our telephone numbers remain the same.

The CCES is an independent, national, non-profit organization. Our mission, to foster ethical sport for all Canadians, is carried out through research, promotion, education, detection and deterrence, as well as through programs and partnerships with other organizations.
