MEDIA RELEASE

2002 a Busy Year for CCES

(Ottawa, ON – May 8, 2003) - The Canadian Centre for Ethics in Sport (CCES) is pleased to report on its Doping Control Program testing activities for 2002. The CCES provided services to the Canadian sport community in a number of important areas during 2002, including implementing pilot projects to incorporate blood testing into Canada's Doping Control Program, and education and pre-games testing for the Salt Lake City Olympic Games and the Manchester Commonwealth Games.

Jeremy Luke, Senior Manager, Doping Control Program says, "Last year was a very productive one. We are looking forward to new projects for 2003 including expanding the blood testing program, preparations for the Pan Am games in Santo Domingo and planning for the implementation of the WADA Code."

The CCES reports statistics in the following categories:

Domestic Program: A total of 1,610 tests were conducted as part of the domestic testing program. Of these tests, 1,597 were conducted on Canadian athletes with 1,101 (69%) on an unannounced basis and 496 (31%) on an announced basis. Seven infractions were reported in six different sports including, Athletics, CCAA: Football, CIS: Football, Cycling, Triathlon, and Weightlifting

Blood Testing Pilot Project: A total of 14 blood/urine tests were conducted on athletes in the sports of cycling, athletics and swimming.

Major/International Games: A total of 237 tests were conducted on athletes at twenty-seven different events held in Canada in 2002. 27 of the athletes tested were Canadian and 210 were foreign athletes.

World Anti-Doping Agency (WADA) tests: A total of 507 tests were conducted at the request of the World Anti-Doping Agency. 229 tests were carried-out on Canadian athletes and 278 on foreign athletes. All of these tests were conducted on an unannounced basis.

International Federation (IF) tests: At the request of various International Federations, the CCES conducted a total of 35 tests on foreign athletes in 2002. International Federations conducted 2 tests on Canadian athletes, one infraction was reported in the sport of Triathlon.

Contract Service tests: A total of 86 tests were conducted outside of the Canadian Policy on Doping in Sport for the sports of bodybuilding and equestrian. Five infractions were reported in the sport of bodybuilding.

The CCES is responsible for all aspects of the Canadian Doping Control Program, including athlete testing. The Program is certified under ISO 9002 and the CCES provides quarterly and annual reports of all doping control tests carried out in Canada.

Unannounced: refers to athlete testing conducted with little or no warning, primarily occurring during training and out of competition.

Announced: refers to scheduled testing primarily during competitions where athletes are aware that testing will occur.

**In addition to the above noted infractions on Canadian athletes, please note that positive findings of international athletes are dealt in accordance with the appropriate International Federations and therefore not represented above.*
